PROFESSIONAL Orthodontics

PROFICIENCY *Proficient in contemporary orthodontics using Temporary Anchorage Devices (mini-implants)
and utilizing 3D Cone-beam CT / imaging software*

Competent for Orthognathic Surgery, Sleep Apnea, Craniofacial and multi-disciplinary cases

Invisalign Preferred Elite Provider , Incognito (Hidden lingual braces) Provider

Pediatric Dentistry

Behavior management, IV sedation, conscious sedation, Interceptive orthodontics
Pediatric Advanced Life support license

Sleep Apnea

Developed on a pioneering technique, performing maxillary distraction osteogenesis for the treatment of obstructive sleep apnea (OSA) with Stanford sleep medicine. Also has developed a surgery-first approach orthodontic protocol for MaxilloMandibular Advancement Surgery and established the grading scale of ankyloglossia. Currently active areas of research also include OSA genomic sequence and craniofacial morphologic relationship, craniofacial growth modification, frenulum inspection and myofunctional therapy
